

Landscaper Transition Fund

The fund was established to incentivize the transition to battery-powered lawn care equipment by providing financial assistance to the landscaping community. The creation of this fund is one outcome of **Changing the Landscape: Healthy Yards = Healthy People/Cambiando el Paisaje: Jardines Sanos = Gente Sana**, a year-long project dedicated to improving the health of the environment and workers' health through adopting sustainable landscaping practices. Quiet Princeton, a group of concerned Princeton citizens working to improve the quality and peace of our community by removing sources of noise and pollution, has been a dedicated partner in this effort.

We are sincerely grateful to the community members that have generously donated to this fund.
